Willy Carrier’s meticulous attention to quality and detail led to a major cultural shift in the way we live indoors. More than a century later, Carrier Corporation operates with a unique willingness to develop new technology, the confidence to revise proven designs and the ability to deliver results with every new installation.

Part of that equation is our nationwide network of experts you can turn to for all of your indoor comfort needs. Your local Carrier dealer is well equipped to evaluate your home—everything from size, window placement, ductwork, venting and other structural specifics—and create a customized system designed around your lifestyle. So when it’s time to make a choice for your family’s comfort, make the best decision you’ll ever make—Carrier—and let the experts do the rest.

Energy-Efficient Air Conditioner
Designed with Your Comfort in Mind

What Efficiency Means to You

Air conditioners are powered by different air conditioner models by checking the SEER (Seasonal Energy Efficiency Ratio) ratings, available through your Carrier dealer or manufacturer web sites. The published ratings provide a standardized method for comparing how much cooling performance you get for the electricity you use.

Using these ratings is a lot like miles per gallon for your car—the higher the number, the more efficient the product and the greater potential for savings. Actual air conditioner performance will vary based on the age and condition of your home, personal comfort preferences, weather patterns in your area and much more.

When you are comparing air conditioners, be sure to look at the SEER ratings before you make your decision.

The Total Indoor Comfort System

Infinity® 16 offers plenty of potential for annual savings while providing extra-comfortable cooling. When compared to a standard efficiency air conditioner, you can save up to $59 a year.†† And, if you are replacing an older, less efficient model, the savings can be even more significant.

The Infinity® 16 Air Conditioner

The Infinity® 16 offers energy efficiency of up to 16.0 SEER to provide reduced energy usage and environmental impact.

Greater Operational Efficiency

The Infinity® 16 offers energy efficiency of up to 16.0 SEER to provide reduced energy usage and environmental impact.

The Infinity® 16 provides invaluable, high-efficiency cooling for years of reliable operation and energy savings. Infinity® Central Air Conditioner provides reliable, high-efficiency heating for long-lasting comfort and energy savings.

Evaporator Coil is made with the proven reliability, efficiency and years of reliable service.

The Infinity Outdoor Air Handler provides reliable, high-efficiency heating by capturing and directing outdoor air to your indoor comfort system. Ventilation combines fresh outdoor air with controlled indoor air for improved air quality and maximum comfort.

Infinity Comfort is more than a thermostat. It’s your interface to the Infinity System that allows you to control temperature, humidity, air quality, fan speed and ventilation.

The Total Indoor Comfort System

Infinity® 16
Air Conditioner

Energy-Efficient Air Conditioner
with up to 16.0 SEER
Innovation and the Environment

Over 100 years ago, a humble but determined engineer solved one of mankind’s most elusive challenges by controlling the indoor environment. A leading engineer of his day, Dr. Willis Carrier would receive more than 80 patents over the course of his career. His genius would enable incredible advancements in health care, manufacturing processes, food preservation, art and historical preservation, indoor comfort and much more.

Carrier’s foresight changed the world forever and paved the way for over a century of one-of-a-kind innovations. In addition to being an accomplished inventor, he was also an avid outdoorsman. Carrier recognized the power and beauty of the natural environment. This appreciation of our world and its resources continues to guide Carrier Corporation today. We will never rest on our accomplishments, but instead constantly seek ways to improve our products, our environment and our world.

The Infinity® 16 air conditioner delivers comfort and reliability. The heart of your air conditioner system, the compressor runs smoothly to contribute quiet, efficient cooling.

The compressor is a key component of your air conditioner system. The Infinity® 16 air conditioner quietly cools your home with sound levels as low as 66 dBA. Our exclusive fan motor, forward-swept fan blades, compressor vibration isolator plate, sound hood and split-post vibration isolation system provide superior performance and longevity.

The Infinity 16 air conditioner quietly cools your home with sound levels as low as 66 dBA. Our exclusive fan motor, forward-swept fan blades, compressor vibration isolator plate, sound hood and split-post vibration isolation system provide superior performance and longevity.

Environments Sound Refrigerant

Carrier technology allows you to control humidity levels even when your comfort system is not operating. This smart system can automatically turn on your comfort system just for dehumidification. † You’ll enjoy cool, comfortable conditions, performance and energy savings when you include an Infinity humidifier and variable-speed carrier system. This system provides unsurpassed control of not only temperature, but also humidity, dehumidification, fan speed, weekly comfort schedules and more.

Carrier gives you complete control of your comfort system and the standard for environmentally sound and quiet dehumidification. All you need to do is set your comfort control to the standard for environmentally sound and quiet dehumidification and heat pump performance well ahead of industry standards. Today, Carrier air conditioner and heat pump systems using Puron refrigerant set the new standard for environmentally sound and quiet dehumidification. Puron refrigerant is environmentally sound and won’t impair the ozone layer. Carrier systems using Puron refrigerant set the standard for environmentally sound and quiet dehumidification and heat pump performance well ahead of industry standards. Today, Carrier air conditioner and heat pump systems using Puron refrigerant show exceptional reliability and are a testament to our industry leadership.

It’s About Your Comfort

Uncompromising Quality

You don’t lead an industry for more than 100 years by accident. Carrier has maintained its position and reputation through diligence, uncompromising quality control at every stage of its products’ life from concept to completion. Once our product is installed at your home, you can be confident that durable construction and built-in reliability features ensure your comfort for years to come.

Built-in reliability: Forward-swept fan blades enhance blade efficiency and move more air at lower sound levels. Smart electronics that monitor system operation and a compressor-protecting filter shroud help keep critical components operating at their best.

Durability: WeatherArmor Ultra™ protection shields the air conditioner from hail, errant soccer balls, lawn equipment and other hazards. Our combination of a galvanized steel cabinet, louvered coil guard and built-in rust protection provides superior rust protection and keeps your system looking its best for years.

Puron® refrigerant is environmentally sound and won’t impair the ozone layer. Carrier systems using Puron refrigerant set the standard for environmentally sound and quiet dehumidification and heat pump performance well ahead of industry standards. Limited Warranty

To the original owner, the Carrier Infinity 16 air conditioner is covered by a 10-year parts limited warranty and 10-year labor limited warranty when properly installed by a Carrier dealer or service technician. Call Carrier for details, or visit carrier.com/warranty.
Innovation and the Environment

Carrier led the industry by incorporating non-ozone-depleting Puron® refrigerant into air conditioners back in 1987. Millions of Puron® refrigerant units are in operation today on a testament to the durability, reliability and enduring quality of these products.

Leaders in Technology

The Infinity® 16 air conditioner quietly cools your home with sound levels as low as 66 dBA. Our exclusive fan motor, forward-swept fan blades, compressor and system design deliver both comfort and reliability. The heart of your air conditioner and heat pump system operation and a compressor-protecting filter drier, help keep critical components working at their best.

It’s About Your Comfort

Puron® refrigerant is environmentally sound and won’t deplete the ozone layer. Carrier systems set the standard for environmentally sound air conditioning.

Uncompromising Quality

You don’t lead an industry for more than 100 years by accident. Carrier has maintained a position and reputation through diligent, uncompromising quality control at every stage of production—literally from concept to completion. Once our product is installed at your home, you can be confident that durable construction and build-quality features ensure your comfort for years to come.

Built-in reliability: Forward-swept fan blades enhance efficiency and minimize sound. Smart electronics that monitor system operation and a compressor-protecting filter drier help keep critical components operating at their best.

Durability: WeatherArmor Ultra™ coat features ensure your comfort for years. And keeps your system looking its best. The Carrier® Infinity® 16 air conditioner represents years of design, development and testing with one goal in mind — making you more comfortable.

There are many reasons why the Carrier® Infinity® 16 air conditioner is the right choice for your home. From substantial performance and energy savings to exceptional comfort, it truly is the most comfortable solution available.

The Carrier® Infinity® 16 air conditioner is designed to get the most out of the most important accomplishment that mankind’s most elusive challenges by determined engineer solved one of much more.

Carrier’s foresight changed the world for the better. As an ENERGY STAR® partner, Carrier Corporation has determined that the Infinity 16 air conditioner meets ENERGY STAR guidelines for energy efficiency. As an ENERGY STAR® partner, Carrier Corporation has determined that the Infinity 16 air conditioner meets ENERGY STAR guidelines for energy efficiency. Innovation and the Environment

Over 100 years ago, a humble but determined engineer solved one of mankind’s most pressing challenges by controlling the indoor environment. A leading engineer of his day, Dr. Willis Carrier would later receive more than 80 patents over the course of his career. His genius would enable incredible advancements in health care, manufacturing processes, food preservation, art and historical conservation, indoor comfort and much more.

Carrier’s foresight changed the world forever and paved the way for over a century of once-impossible innovations. In addition to being an accomplished scientist, he was also an avid outdoorsman, explaining his appreciation of our world and its resources continues to guide Carrier Corporation today. We will never rest on our accomplishments, but instead consistently look for ways to improve our products, our environment and our world.

The Infinity® 16 air conditioner represents years of design, development and testing with one goal in mind – making you more comfortable. We have taken in the latest technologies that deliver the comfort and efficiency you deserve while staying ahead of industry trends and global initiatives.

All year long, humidity affects the comfort level at which you feel most comfortable. That’s why Carrier Ideal Humidity System technology allows you to control humidity levels even when your system isn’t actively heating or cooling.† You’ll feel cooler at higher temperatures in the summer and warmer at lower temperatures in the winter.

Puron® refrigerant is environmentally sound and won’t deplete the ozone layer. Our exclusive Puron refrigerant set the standard for environmentally sound air conditioners and heat pumps using Puron refrigerant show exceptional reliability and are a testament to our industry leadership.

Limited Warranty
To the original owner, the Carrier Infinity 16 air conditioner is covered by a 10-year parts limited warranty on labor, a 10-year parts limited warranty on labor, and a 10-year parts limited warranty on labor. See warranty certificate at carrier.com for complete details.

*Warranty period is five years if not registered within 90 days. Jurisdictions where warranty restrictions are not allowed will automatically receive a 10-year parts limited warranty. See warranty certificate at carrier.com for complete details.

You don’t lead an industry for more than 100 years by accident. Carrier has maintained its position and reputation through diligent, uncompromising quality control at every stage of products’ lives from concept to completion. Once our product is installed at your home, you can be confident that durable construction and built-in reliability features ensure your comfort for years to come.

- Built-in reliability: Forward-swept fan blades enhance blade efficiency and add to our commitment to your comfort, delivering environmentally-sound, energy-efficient cooling.
- Uncompromising Quality: These sound levels, mentioned for comparison, as published at www.energystar.gov.
- The Infinity® 16 air conditioner with scroll compressor delivers both comfort and reliability. The heart of air conditioning systems, this compressor runs smoothly to contribute quiet, efficient cooling.
- Environmentally Sound Refrigerant: Carrier led the industry by incorporating non-ozone-depleting Puron® refrigerant into air conditioners back in 1994. Millions of Puron® refrigerant units in operation today are a testament to the reliability, durability and enduring quality of these products.
- It’s About Your Comfort: The Infinity 16 air conditioner quickly cools your home with sound levels as low as 66 dBA. Our exclusive Silence System™ feature includes a silenced top, integrated 15⁄16” knockdown cabinet, vibration isolator plate, sound hood and split-post compressor components to help deliver quiet operation by maximizing airflow and minimizing vibration.
- Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR® criteria. Ask your dealer for details or visit www.energystar.gov.
- You give us the instructions and we’ll make your comfort a priority. The Infinity variable-speed compressor, fan motor, forward-swept fan blades, compressor vibration isolator plate, sound hood and split-post compressor components, together, help keep critical components operating at their best.
- Durability: WeatherArmor Ultra™ protection starts from the inside out. Heavy gauge stainless steel cabinet, baked-on powder paint and baked-on powder-paint provide superior rust protection and keeps your system looking its best for years.

As an ENERGY STAR® partner, Carrier Corporation has determined that the Infinity 16 air conditioner meets ENERGY STAR guidelines for energy efficiency.

What Efficiency Means to You

Air conditioners are powered by electricity. You can compare efficiencies of different air conditioner models by checking the SEER (Seasonal Energy Efficiency Ratio) ratings available through your Carrier dealer or manufacturer web site. The published ratings provide a standardized method for comparing how much cooling performance you get for the electricity you use. Using these ratings is a lot like miles per gallon for your car – the higher the number, the more efficient the product and the greater potential for savings. Actual air conditioner performance will vary based on the age and condition of your home, personal comfort preferences, weather patterns in your area and much more.

So when you are comparing air conditioners, be sure to look at the SEER ratings before you make your decision.

The infinity 16 offers plenty of potential for annual savings while providing extra-comfortable cooling. When compared to a standard efficiency air conditioner, you can save up to $59 a year. And, if you are replacing an older, less efficient model, the savings can be even more significant. *Values based on AHRI method for estimated operating cost using U.S. average cooling hours.

Greater Operational Efficiency

The Infinity 16 offers energy efficiency of up to 16.0 SEER to provide reduced energy usage and environmental impact.

Carrier® Systems for Unmatched Performance in Every Season

Willis Carrier’s meticulous attention to quality and detail led to a major cultural shift in the way we live indoors. More than a century later, Carrier Corporation operates with a unique willingness to develop new technology, the confidence to revise proven designs and the ability to deliver results with every new installation.

Part of that equation is our nationwide network of experts you can turn to for all of your indoor comfort needs. Your local Carrier dealer is well equipped to evaluate your home – everything from size, window placement, ductwork, venting and other structural specifics – and create a customized system designed around your lifestyle. So when it’s time to make a choice for your family’s comfort, make the best decision you’ll ever make – Carrier – and let the experts do the rest.

The Total Indoor Comfort System

Infinity Air Purifier maintains indoor air quality by capturing and removing airborne particles, inhibit growth of airborne bacteria and viruses and other irritating airborne pollutants.

The Infinity Air Purifier provides superior indoor air quality by capturing and removing airborne particles, inhibiting the growth of airborne bacteria and viruses and other irritating airborne pollutants.

The Total Indoor Comfort System is a complete indoor comfort system that allows you to control temperature, humidity, air quality, fan speed and ventilation.

The Infinity 16 air conditioner offers energy efficiency of up to 16.0 SEER to provide reduced energy usage and environmental impact.

ENERGY STAR 

The Infinity 16 offers energy efficiency of up to 16.0 SEER to provide reduced energy usage and environmental impact.

The Infinity® 16 offers plenty of potential for annual savings while providing extra-comfortable cooling. When compared to a standard efficiency air conditioner, you can save up to $59 a year.†† And, if you are replacing an older, less efficient model, the savings can be even more significant.

The Infinity 16 offers energy efficiency of up to 16.0 SEER to provide reduced energy usage and environmental impact.
